Sit Down for This

Father I see the light is on The grim reaper is asleep Got his hands on all your people It don't feel right, know I know something's wrong We chased a lot, we're holding on Father someone's on the phone And this doctor's in my ear sounding scared And now my mind is going crazy, yo what's going on? What's going on?

And he says, "Maybe you should sit down for this You should sit down for this, we have your family here Maybe you should sit down" But I don't wanna sit down for this I'm not prepared, what's going on? What's going on?

Father I can't take it, heart is palpitating Tryna tell myself I know you're in control Tryna tell myself I know you got me Lord And my family in your hands But I'm only just a man and I break down Father can you save 'em Father can you take my broken pieces, make a way Oh God, can you make a way, but it's your will And I'm out to take this 9 to 5 and make it real So real, so real Father can you save 'em? Can you change the way this happened? Can you work a miracle? Yeah I know you can but will you turn it around? I'm on my cellphone now

Doctor's saying "Maybe you should sit down for this You should sit down for this, we have your family here Maybe you should sit down" I don't wanna sit down for this I don't wanna, I don't wanna, I don't wanna sit down

This is an emergency
