

Internal Corruption

Malignancy

Incoherent and desolate
Thoughts suppressed by fluctuating dementia
Sunken features display a face in torment
Feeble legs support this skeletal frame

Skin wrapped tight, clinging to crumbling bone
Ashamed of your being, reside in seclusion

Abrasions bloat seeping water
Cancrum tear lips
Outbreak of psoriasis sheds disease
Scaly patches of skin undulate with the stress of
corruption

Malnourished, emaciated mess
Bound to miracle drugs that attempt to stabilize
terminal condition

Bowel movements well up
Discharging pasty, blood soaked feces
Regurgitate thick, brown clumps of bile
Waste away, your body shuts down
