

Post Fetal Depression

Malignancy

Suffocate our own offspring
A mirror image of ourselves
Precious life, taken for granted
Caved in skull

Brutalized!

Bruised and bloody open wounds
Crushing brittle bones
Gnawing on softened skin
Blackened eyes, broken nose

Abandoned with a dented head
Air choked out with a plastic bag
Helpless infant frost-bitten
Unwanted innocent, left for dead

Strangled throat, punctured skin
Organs bleeding from within
Sick and dying malnutrition
Decrepit body, hunger affliction

Sodomized, penetration, orifice distortion
Violated with father's love
