

## Post Fetal Depression

Malignancy

Suffocate our own offspring  
A mirror image of ourselves  
Precious life, taken for granted  
Caved in skull

Brutalized!

Bruised and bloody open wounds  
Crushing brittle bones  
Gnawing on softened skin  
Blackened eyes, broken nose

Abandoned with a dented head  
Air choked out with a plastic bag  
Helpless infant frost-bitten  
Unwanted innocent, left for dead

Strangled throat, punctured skin  
Organs bleeding from within  
Sick and dying malnutrition  
Decrepit body, hunger affliction

Sodomized, penetration, orifice distortion  
Violated with father's love
