## **Post Fetal Depression**

Suffocate our own offspring A mirror image of ourselves Precious life, taken for granted Caved in skull

Brutalized!

Bruised and bloody open wounds Crushing brittle bones Gnawing on softened skin Blackened eyes, broken nose

Abandoned with a dented head Air choked out with a plastic bag Helpless infant frost-bitten Unwanted innocent, left for dead

Strangled throat, punctured skin Organs bleeding from within Sick and dying malnutrition Decrepit body, hunger affliction

Sodomized, penetration, orifice distortion Violated with father's love

## Malignancy
