

Type Zero Civilization

Malignancy

Humanity forced underground due to unforeseen disaster.
Subterranean habitat for humankind to continue
When all else is gone, witness to this rebirth.

Are we the next step in genetic expression?
Not the shining examples the race intended.

Proponents of the collective conscious.
Confusion and disbelief as the protocols are read.
Teachings synonymous with futurists.

Mixtures of degraded genes, emotional archetypes,
mentally deficient.
A new approach to a social congregation.
Functionaries in the great human expansion.
Degraded genes, emotional archetypes, bygone error.

The crossroads of evolution.
History has been rewritten.

Carnivores that feed on everything exploited.
No more boundaries of race, creed or religion.
Will they survive this new chapter?
Do they deserve to live on?

In a world riddled with all the things that make us
filth.
Trying to settle into the daily rituals of a holocaust.

A culmination of what makes us best?
Type Zero miscreants
This unwilling unity stands the test of time.
