

Heart & Desire

Mallory Knox

The path we take is paved with mistakes, bad moves & promises made
That we left inside the darkness through our brightest days
As we walk along we will find ourselves in a field from the love we made
But the walls we built around it will crumble & fall away

These bright lights, big dreams they always meant the whole damn world to me
I'm just sorry that you can't be here to watch this with me

So give em heart, give em desire
Show the world your best & in time you will inspire
Don't slow down now it's over
With all your heart & all your fire
You gave me hope when times were hard & called me lover
Don't slow down now it's over
Oh why won't you tell me it's over?

If I could light up the world for you I'd show you the things you'd always dreamed
About trust & time & heart & love & honesty
But honestly times are changing now & I have to move away
In the hope that time will lead us back again someday

These bright lights, big dreams they always meant the whole damn world to me
I'm just sorry that you can't be here to watch this with me

So give em heart, give em desire
Show the world your best & in time you will inspire
Don't slow down now it's over
With all your heart & all your fire
You gave me hope when times were hard & called me lover
Don't slow down now it's over
Oh why won't you tell me it's over?

You gave me all your heart, gave me all your time lover lover
You gave me all your heart, gave me all your time lover lover
Gave me all your heart, gave me all your heart
You gave me all your heart, gave me all your time lover lover
You gave me all your heart, gave me all your time lover lover
Gave me all your heart, gave me all your heart
You gave me all your heart, gave me all your time lover lover
You gave me all your heart, gave me all your time lover lover
Gave me all your heart, gave me all your heart
Gave me all your heart, gave me all your heart
So give em heart, give em desire

So give em heart, give em desire
