

# Wolves

Mallory Knox

It's built on foundations of SAND  
It's never quite enough to keep hold of and...  
LIES will act as planned  
Set 'em off and watch your dreams descend  
The wolves come out...

Sweetest enemy, I know you're  
You're building me up to break me down  
You never seem to come around  
Sweetest enemy I know you're  
Drifting alone  
A night full of lies got me hiding inside from the sun  
And hoping in time that the worst would have been and gone  
Yeah, you can't hold me back with promises, your words are filled with doubt  
Lock the door and watch me walking out  
Sweetest enemy, I know you're  
You're building me up to break me down  
You never seem to come around  
My sweetest enemy, I know you're  
Drifting alone  
You're gone, gone- we're gunning for you  
We know your sin and we're running faster (2x)  
You're gone, gone - we're gunning for you  
We know your sin- we're running faster  
You're gone, gone - the wolves will gun for you

The wolves come out...  
Will you hear them screaming calling out?

My sweetest enemy, I know you're  
Building me up to break me down  
You never seem to come around  
My sweetest- My sweetest enemy I know you're  
Drifting alone  
I know you're drifting alone
