

Shadowborn I rule the night
In the darkness I'm alright
Constellations help me find
How to redshift from the light

Somehow blinded - by our own
- imperfection - always eludes us
- never been - fully transparent
- to ourselves - when blind lead blind...

Shadowborn I rule the night
In the darkness I'm alright
Constellations help me find
How to redshift from the light

Adaptation - to see in the dark
- a translation - of white into black
- field of view - carefully adjusted
- passing through - to not get hurt...

Conflagration of the mind
the event horizon
Pull me to the other side!
I'll reverse to course of time
and revive its glory
Grant me strength for one last ride!

Pull... to the other side!
Pull me to the other side!
