

Borderline

Man Overboard

I packed my bags and looked to the west, kissed her picture twenty times

Take some clothes and a deep breath, go commit the perfect crime

I didn't ask for much but now it's much too late, if she can't help me now then there's no time to waste

I will not fail us now, if you just wait you'll see

I will not let us down, I will get myself free

I will get myself free as the day that you found me

Before I got caught in this mess that's around me it won't happen again

The first night I took one to the chest, dancing on the borderline

I wrecked the mood and I must confess, missed the picture every time

I guess it's just like me to get real sentimental before I leave

We write off love and then we're off
