

# I Have a Dream

Manifest

I have a dream  
For every neglected child & teen  
I have a dream  
That I could do almost anything  
I have a dream  
To spread truth love & harmony  
I have a dream  
Where I could change the world without it changing me

I had a dream I was flying so high  
I could see and hear the nations crying out to the sky  
I had a dream I could save them  
No ultimatums  
Bring them to a haven where the earths not shaking  
Dreaming of a day where the worlds not hating  
Dreaming is believing I'm seeing salvation  
New generation stop confrontation  
I can see it now were all one in the same  
To no more poverty  
New technology  
Healing our economy  
Some day it's got to be  
Where we can all stand  
And march together  
Sing a song of freedom  
Let it dominate forever

I have a dream  
For every neglected child & teen  
I have a dream  
That I could do almost anything  
I have a dream  
To spread truth love & harmony  
I have a dream  
Where I could change the world without it changing me

Pardon my passion an plea  
How do I say politely  
We lived this nightmare long enough  
I'm trying to see martins dream  
I had a talk with a teen timid but told me some things  
And it made me think about myself and how we perceive the scene  
He said my mommas a fend  
My daddy's queen ain't never had a man in my life, left when I was 16  
The streets is all that I've seen  
Get up get the cream  
If you get popped in the pursuit just chalk it up as routine  
I'm thinking what do you mean?  
Lil homie what do you mean  
More then that poverty mentality no scholarly dreams  
I'm holding hope for some things  
You keep the rubies and rings  
My jewelry is the community how thick is the chain  
I dropped my heart and picked my life up at the foot of the king  
Listen close you can hear martin sing

I have a dream

For every neglected child & teen  
I have a dream  
That I could do almost anything  
I have a dream  
To spread truth love & harmony  
I have a dream  
Where I could change the world without it changing me

My dream like Dr. Kings' is something rarely seen  
Still holding on for the day that we let freedom ring  
In between, what's real and what we really need  
They persecute my pain and others tell me let it be  
Man please  
I tried to move past it  
They see my kindness but mistake it like I'm passive  
Pleading with the main in the mirror, Michael Jackson  
To them this freedom talk sounds funny like a accent  
The cop said that this is protocol  
America this system needs an overhaul  
In this system I'm the underdog but, I refuse to loose  
They tell me that's it's fine man it's really you  
They in the matrix, that's why kids taking  
Blue pills  
Truth is  
You can't escape it

I have a dream  
For every neglected child & teen  
I have a dream  
That I could do almost anything  
I have a dream  
To spread truth love & harmony  
I have a dream  
Where I could change the world without it changing me
