

# The Chase

Manafest

I can't stop the chase... I can't stop the chase...

Always feel like I'm on the run  
Feel guilty when I'm having fun  
Only work seems to turn me on  
Burning out, and I've just begun  
Brain won't stop, chase the clock  
Race to the top take it all  
Girl I know, I need to come home  
In my world surrounded alone  
If I could you know I would  
Knock on wood I know I should  
Slow it down, one more round  
See this crowd let me rock them out

I'm in the middle of the race  
Can't stop the chase  
They're pulling away

I got to be on top  
My dreams on lock  
They won't let go of me

I can't stop the chase  
It's too late can't turn it off, till I reach the top won't ever stop  
Til you know my name  
Got to keep the pace, cause your never gonna stop the chase

I can't stop the chase, I can't stop the chase

Still going Yup,  
Haven't talked to myself in awhile  
Touring round, round, mashed out  
Don't want let me down  
Now (hah) spitted, with uh, kicked with ah  
Freestyle, can anybody huh, freak me out  
When I'm on stage I get so wild  
Cause I got great faith, stepping in late, I stayed straight  
I got it made it's just my destiny- UH

I'm in the middle of the race  
Can't stop the chase  
They're pulling away

I got to be on top  
My dreams on lock  
They won't let go of me

I can't stop the chase  
It's too late can't turn it off, till I reach the top won't ever stop  
Until you know my name  
Got to keep the pace cause your never gonna stop the chase

I woke up in a sweat again  
Choked up from the medicine  
Can't sleep keep wrestling  
Success is so dangerous

If I chill can't pay the bills  
If I'm I'll can't spit the real  
Some would kill for the life I live  
Some will build sacrifice and win  
Chased them all faced them all  
Paced the hallway walls and brawled  
Just no way I can turn it off; but  
Some how always turn back to God

I'm in the middle of the race  
Can't stop the chase  
They're pulling away

I got to be on top  
My dreams on lock  
They won't let go of me
