

Fly to stay alive

MaNga

You've fallen right out of the sky
I could swear you were natural high
Volcanoes erupting inside
When I see the sparkle in your eyes
But you don't even realize
'Cause you've been hurt so many times
They played with your heart, told you lies
They were wrong all along you were right

But if you could see my love through a bird's eye
View, you would know how beautiful it is to

Fly, baby, fly
We gotta fly to stay alive
These words, these words
No magic till we try
Take a leap, leap of fate
Reach for the stars in the night
Break the curse of this earth
These miracles up in the sky
Where love birds fly

Like angels from heaven on earth
We know that love will never die
We dust off the pain and the dirt
And discover the diamond inside
I'm not saying I'm the perfect man
But I swear I will give it a try
I'm no pilot, I've got no wings but I
I know we will survive

'Cause if you could see my love through a bird's eye
View, you would know how beautiful it is to

Fly, baby, fly
We gotta fly to stay alive
These words, these words
No magic till we try
Take a leap, leap of fate
Reach for the stars in the night
Break the curse of this earth
These miracles up in the sky
Where love birds fly

Fly, baby, fly
We gotta fly to stay alive
These words, these words
No magic till we try
Take a leap, leap of fate
Reach for the stars in the night
Break the curse of this earth
These miracles up in the sky
Where love birds fly
