Further Away

Manic Street Preachers

The further away I get from you The harder it gets for everyone else, for everyone else

The happier I am when I'm with you The harder it gets when I am alone, when I am alone

The harder I try to learn something from you Further away

Further away feel it fade into your childhood further away Further away feel dazed and misunderstood Further away

The stiller the oxygen the harder you breathe The draining away just like an old man's dream Just like an old man's dream

The simpler the answer the harder it can get The circular landscape comes back only with regret Only with regret

The more estranged I feel from my youth further away

Further away feel it fade into your childhood further away Further away feel dazed and misunderstood Further away

Further away feel it fade into your childhood further away Further away feel dazed and misunderstood Further away Further away Further away Further away
