Dragon Star

Manilla Road

Night sky turned into fire Like Saxon funeral pyres Melting away the ice With heat from solar light

To William and his horde This omen was The Word Victorius he would be Against all Saxony

Through solar winds
The comet lives
Bringer of war
Torch of The Gods
The Dragon Star

Throughout our destiny
This star has been the key
To wars both lost and won
And birth of Christendom

Too late we find the truth
That's lost within our youth
The way of Gods and men
Have strayed apart again

Alexander
Born of The Star
MOrtal of God
Who cut the Gordian Knot

Bring back the faith It's not too late To turn the tides From genocide

A message from The Gods The Cycle carries on Life passes to be born In yet a higher form

This is the way of life As day must turn to night The Star shall fade away As we must all one day
