

## Flesh and Fury

Manilla Road

There you are in jet white allegiance  
Sending words of wishful thinking through the air  
There you stand on the thin ice of believing  
Squared for battle, you here the trumpets call

Faith take hold, cold smile disguises  
Kneel and breed deception  
Then the world, look thru it's fingers  
Finds there's just not much to see

In our power glory to us one and all  
Feel no love in freedom  
Don't cry, it's only thunder in your head  
Driving flesh and fury

There you are in a flash of frozen moments  
On tomorrows edge and waiting at the gate  
There you stand killing all your words of love  
Whispering hooks in the mouth of fate

Fall from grace, talk from the corners  
Raise your hands to heaven  
Then from the shadows choice comes crawling out  
In silence, sister victory

Can you see them come to rescue me  
Mother reaching out to compassion  
Can you see them standing on the other side  
The warning, god has come for you

Here we are a circle of shadows  
Waiting in the wings  
Here we are stand patiently watching  
The wheels set in motion

Over-night sensation breaking  
Overkill religion  
Back from the alley, truth comes screaming out  
For mothers of mercy

In our power glory to us aone and all  
Feel no love in freedom  
Don't cry it's only thunder in your head  
Driving flesh and fury
