Flesh and Fury

Manilla Road

Ther you are in jet white allegiance Sending words of wishfull thinking through the air There you stand on the thin ice of believing Squared for battle, you here the trumpets call

Faith take hold, cold smile diguises Kneel and breed deception Then the world, look thru it's fingers Finds there's just not much to see

In our power glory to us one and all Fell no love in freedom
Don't cry, it's only thunder in your head Driving flesh and fury

There you are in a flash of frozen moments On tomorrows edge and waiting at the gate There you stand killing all your words of love Whispering hooks in the mouth of fate

Fall from grace, talk from the corners
Raise your hands to heaven
Then from the shadows choice comes crawling out
In silence, sister victory

Can you see them come to rescue me Mother reaching out to compassion Can you see them standing on the other side The warning, god has come for you

Hre we are a circle of shadows Waiting in the wings Hare we are stand patiently watching The wheels set in motion

Over-night sensation breaking Overkill religion Back from the alley, truth comes screaming out For mothers of mercy

In our power glory to us aone and all Feel no love in freedom Don't cry it's only thunder in your head Driving flesh and fury
