

Power's In The People

Marc Broussard

Hey brotha, Hey there brotha, What's on your mind
Guessin no one's asked you in a quite a long time
Hey my sista, What's goin down
How you livin' while the world is spinnin' round

Doctor's hands are tied, Teacher's underpaid
We put all our worth in the money that is made
Times are changin, they're movin so fast
Got to stick together or we ain't gonna last

We gotta fight, To survive, As a people
We gotta fight, fight, fight for our lives
If there's ever a time, In your life
You better fight, fight, fight to survive

Well it's dog eat dog, Family livin' on the street
Daddy's beggin' for money, all he wants is a drink
Television ain't the only place to get the news
Talk to a neighbor, Pay back a favor
There's someone countin' on you

Children left alone, Told to mind their own
Momma's workin late and she ain't comin home
All our young folk, growin up so fast
Gotta stick together or we ain't gonna last

We gotta fight, To survive, As a people
We gotta fight, fight, fight for our lives
If there's ever a time, in your life
You better fight, fight, fight to survive

What about the future, Find a new solution
Open our mind, still got time, start a revolution
Every woman, child and man lend a helping hand
All for one and one for all, The Power's In The People

We gotta fight, To survive, as a people
We gotta fight, fight, fight for our lives
If there's ever a time, in your life
You better fight, fight, fight to survive
Fight, To survive, as a people
We gotta fight, fight, fight for our lives
If there's ever a time, in your life
You better fight, fight, fight to survive
