

One More Second

Marcus & Martinus

5, 4, 3, 2, one more second with you

We got all the time in this world but its moving so fast
Yeah its moving too fast now
We gotta slow it down girl
I just want it to last, how can we make it last now?
Hands up on the clock take me away from you
Living for the moment now is all I can do
So baby let me take just one more look at you
And count it down down down down

5 all I wish I could do
4 you get you out of this room
3, 2 all I really want is
One more second with you
One more second with you

I'm dreaming of an another life
One that won't take you away
Every night every day girl
Can't get you out of my mind
I just want you to stay
Don't you leave me this way now
Hands up on the clock take me away from you
Living for the moment now is all I can do
So baby let me take just one more look at you
And count it down down down down

5 all I wish I could do
4 you get you out of this room
3, 2 all I really want is
One more second with you
One more second with you

5 all I wish I could do
4 you get you out of this room
3, 2 all I really want is
One more second with you
One more second with you
One more second with you
