Come In Over Me

Maria Mena

You'll get the urge to push me down Only to learn I resurface I am the place where you feel safe and sound But I am gonna make you scream I am gonna crush your dreams Maybe you're on to my conspiracy But baby you fail to learn the details You like the fact that I am hard to read I am gonna hurt you bad and Give you love you've never had Baby, try to leave me I will hunt you down and you know that Baby, try to love me I will make you hurt Come in over me
