Sleep To Dream

Maria Mena

You have it all The ceiling cracks And you fly But I fall again Please say goodbye Take your love out of me And don't ask me why I'm not your friend Trying to stand But you bend me again What's up with that Takes more then this for me to take off my hat but these set of floors Between you and me I sleep to dream I sleep to dream but these set of floors Between you and me I sleep to dream I sleep to dream So you kissed me now This face doesn't seem so great after all Please let me go I need to hear myself think I only hear the water flow I'm not your friend Trying to stand But you bend me again What's up with that Takes more then this for me To take off my hat but these set of floors Between you and me I sleep to dream I sleep to dream but these set of floors Between you and me I sleep to dream I sleep to dream but these set of floors Between you and me I sleep to dream I sleep to dream I'm not your friend Trying to stand But you bend me again What's up with that Takes more then this For me to take off my hat

Takes more then this

For me to take off my hat Takes more then this For me to take off my hat

but these set of floors
Between you and me
I sleep to dream
I sleep to dream
(3x)

Yea these set of floors Between you and me...
