

## Green Butterflies

Maria Taylor

Dream what you can become  
A snake that basks in the sun  
The kettle cries when it's done  
Become it and just keep going

The fight was losing it's fun  
And I never knew if I won  
It can live and die and become  
Learn it and just keep going

A friend that you can lean on  
A daughter constant and strong  
Admit the things I've done wrong  
Say "sorry" and just keep going

The pit inside you gets worse  
The talks are over-rehearsed  
When everything feels reversed  
You switch it and just keep going

Green butterflies, in your sight, in your sight  
The easy pace of morning light  
You'll be free you'll find  
When you give up

Dream how you can exist  
A stranger blowing a kiss  
And is it you that I miss?  
Believe it and just keep going

The fight was losing it's fun  
And I never knew if you won  
It can live and die and become  
We learn it and then just keep going

Green butterflies, in your sight, in your sight  
The easy pace of morning light  
You'll be free you'll find  
When you give up  
When you give up
