Sum of Our Lives

Maria Taylor

Soft spoken spring Whispers graciously Thank you for a new beginning

A second chance on what we started Break from the broken hearted We're more than the sum of our lives

Cower at the face of regret I wanna be the ones who make it We're more than the sum of our lives Of our lives

I could let it be I could set us free But it's never that easy

Our names carved in the pavement All the marks we haven't made yet They're more than the sum of our lives

All that we anticipated What we already created It's more than the sum of our lives Of our lives

Constance of night Tireless sea Comes steady thankfully

A second chance on what we started Break from the broken hearted We're more than the sum of our lives

Cower at the face of regret I wanna be the ones who make it We're more than the sum of our lives Of our lives
