

# There's Only Now

Maria Taylor

We fell into the past  
Got caught up in the looking glass  
I don't care, I'm not scared  
Don't underestimate the waves crash  
I'll be the sunrise in your eyes  
We can make a glass

And when the bad moons rise and we decide  
Make it good by the morning  
On the blackest night we gotta be the light  
It will eat us alive

Like a silver sun, on a endless eve  
Got to keep on shining  
Someway, somehow there's only now to get free

Unless maybe the friend  
Cause my love for you won't end  
Can't keep in time all in line  
With the beating of a bleeding heart  
With every breath you got left  
Every day is a brand new start

And when the bad moons rise and we decide  
Make it good by the morning  
On the blackest night we gotta be the light  
It will eat us alive

And when it's time for me to die  
Will my life keep shining  
In your eyes you can see the light of mine

And when the bad moons rise and we decide  
Make it good by the morning  
On the blackest night we gotta be the light  
It will eat us alive

Like a silver sun, on a endless eve  
Got to keep on shining  
Someway, somehow there's only now to get free

There's only now to get free  
There's only now
