

# Perfect

## Marianas Trench

Please sing to me, I can see you open up to breathe  
Fast words make it easier on me  
Make a point to never disappoint you  
Somebody's got to tell me what to do

Just wish you would've seen me  
When it used to come so easy  
I like to say it's easy to stay but it's not for me  
'Cause I'm barely here at all

Slow down now, the secrets out  
And I swear now everything is perfect

What you want, what you need has been killing me  
Try to be everything that you want me to be  
I say yes I'll undress, I'll do more for less  
And I will change everything until it's perfect again

Coming down, coming around  
Giving a frown to the sound when I hit ground  
I hate the way that I say I should say  
When I know that I don't give a fuck about it anyway

Shake hands, the truth smiles all around  
As I sell my body by the pounds  
Sign my name on the dotted line  
It would be fate to not resuscitate

Slow down now, the secrets out  
And I swear now I'll still make this perfect

What you want, what you need has been killing me  
Try to be everything that you want me to be  
I say yes I'll undress, I'll do more for less  
And I will change everything till it's perfect again

I think it's better this way  
This is good in a better way  
It's better this way  
I'll make this perfect again  
And I'll make this perfect again

What you want, what you need has been killing me  
And I will change everything that you want me to be  
I say yes I'll undress, I'll do more for less  
And I will change everything

What you want, what you need has been killing me  
Try to be everything that you want me to be  
I say yes I'll undress, I'll do more for less  
And I will change everything  
I'll make this perfect again
