

# While We're Young

Marianas Trench

The way your words hang in the moment suspended when  
You say something you can't take back again  
A heavy hush takes hold  
The quiet won't let go  
I was there watching you  
Watching me, missing you  
I've been lying and I don't know why I do  
Maybe the truth hurts so  
It's easier not to know

Wonder why does it  
Hurt to try when the  
Last goodbye is never  
What we're here for

So sing it back if you're with me  
I wanna hear how your heart speaks  
While we're young, while we're young  
This should be the time of our lives  
And I've been so lost without you  
Are you lost without me too?  
While we're young, while we're young  
This should be the time of our lives

Little complacency took you away from me  
We both want it but love is not enough you see  
Sultry disdain, in a perfect frame  
Little by little by little by little bit  
You slipped away into my prominence  
And I don't know how  
We ended up here now

Wonder why does it  
Hurt to try when the  
Last goodbye is never  
What we're here for

So sing it back if you're with me  
I wanna hear how your heart speaks  
While we're young, while we're young  
This should be the time of our lives  
And I've been so lost without you  
Are you lost without me too?  
While we're young, while we're young  
This should be the time of our lives

Got a wish, got a wish that I  
Can just get back to where we came  
God I miss, God I miss you now  
And I can't even say your name

So sing it back if you're with me  
I wanna hear how your heart speaks  
While we're young, while we're young  
This should be the time of our lives  
And I've been so lost without you  
Are you lost without me too?

While we're young, while we're young  
This should be the time of our lives

While we're young, while we're young  
While we're young, while we're young
