

# Essence

Marillion

Tell you what I want  
Essence  
Tell you what I need  
Essence  
What I'm looking for  
Essence

Sit in silence, close your eyes, feel the magic  
everywhere inside you  
Fingers toes head heart and soul, connected deep to  
every living thing  
Not just the taste, the touch, the smell  
Or the face you know so well  
Not the 400 word description  
The book, the film the faithful depiction  
Get out of here  
Get out while you can  
Choose life, strive for essence

Choose life, choose living  
Choose life, choose living  
Choose life, choose living  
Go digging, go digging  
Choose life, choose living  
Choose life, choose living  
Go digging, go digging  
Go digging, go digging  
For essence...

Sit in silence and watch the sky  
Feel the magic deep inside you  
Every woman and every man  
Turn off your mind and you'll understand

Sit in silence and watch the sky yeah  
Feel the energy inside outside  
Every man and woman listen to me, hey  
Live in the moment or you'll never be free

Ain't one damn thing means a thing in this life  
'Til you get close to essence, 'til you try  
every man and woman listen to me, hey  
live in the moment or you'll never be free

Essence  
Essence  
Essence

Choose life, choose essence.
