

# Coma White

Marilyn Manson

1. There's something cold and blank,  
behind her smile  
she's standing on an overpass  
in a miracle mile  
cause you where from the perfect world,  
a world that  
thought me away today,  
today, today to run away

R: A pill the make you numb,  
a pill the make you dumb  
a pill the make you anybody else  
but all the drugs in this world,  
won't save her from her self

2. Her mouth was an empty cut  
she was waited to fail  
just bleeding like a polaroid  
lost all her dolls  
cause you where from the perfect world,  
a world that thought me away today  
today, today to run away.

R: A pill the make you numb...

\*: You where from the perfect world,  
a world that thought me away today

R: A pill the make you numb...
