When will you realize you're already there? So watered-down, your feelings have turned to mud. "Love everybody" is destroying the value of All hate has got me nowhere

I know I'm slipping, I know I'm slipping, I know I'm slipping a way

I know I'm slipping, I know I'm slipping a way

## [chorus:]

Oh no, it is everything they said it was Oh no, I am all the things they said I was Oh no, it is everything they said it was Oh no, I am all the things they said I was

When you you get to heaven you will wish you're in hell When you you get to heaven you will wish you're in hell

When will you realize you're already here? You'll thank us now that you have crossed over Don't pick the scabs or you will never heal The world shudders as the worm gets its wings

## [chorus]

When you get to heaven you will wish you're in hell When you get to heaven you will wish you're in hell

[chorus 3x]
