## She's In Love

Third of June she said goodbye I watched her walk into the night The hardest thing I ever did was let her go We swore as friends we'd stay in touch Best of friends don't mean that much When that phone call comes to tell you She's in love She's in love She's got that fire in her eyes She's in love How her smile lights up the sky It's like she's walking on air She's been set free Still I can't believe She's in love Strolling down a one way street Looking like every man's fantasy She's in love Why can't it be me Told everyone I'm doing fine Learned to get on with my life I just want what's best for her So I lied Found a note on my door last night Said, I'll be your friend until I die But you should know I found someone Now she's in love She's in love She's got that fire in her eyes She's in love How her smile lights up the sky It's like she's walking on air She's been set free Still I can't believe She's in love Strolling down a one way street You'd swear her heart had wings She's in love Why can't it be me She's in love She's got that fire in her eyes She's in love How her smile lights up the sky It's like she's walking on air She's been set free Still I can't believe She's in love Strolling down a one way street You'd swear her heart had wings She's in love Why can't it be me

Why can't it be me
