

# Captivate You

Marmozets

Come what may,  
Feel this pain  
Bleed like you never have before, never have before  
The seasons changed you will remain  
Like you never have before, never have before

And I will captivate you  
With everything I've got  
To bring the best out in you  
One strength one heart  
Is all you need tonight  
Tonight, tonight, tonight

Leaving one city for another making me feel sick  
To the stomach but sick in a good way  
Cos I'm pushing myself to be more outrageous  
and I'm on my way to find it

And I will captivate you  
With everything I've got  
To bring the best out in you  
One strength one heart  
Is all you need tonight  
Tonight, tonight, tonight.

And I will find the time  
To help a soul and heal a bitter mind  
To help a soul and heal a bitter mind

And I will captivate you  
With everything I've got  
To bring the best out in you  
One strength one heart  
Is all you need tonight  
Tonight, tonight, tonight
