

# Collisions

Marmozets

Just take a look, take a look  
At the mess that we've made  
Picking up all the precious things we left behind  
We shot ourselves here again  
Leave our bullets in the ground  
They won't disappear, disappear while we're still breathing

They will not disappear while we're breathing  
One, two, three!

Why are we making this collision between us?  
We can't help ourselves, save yourselves  
This is only the beginning  
Why are we making this collision between us?  
We can't help ourselves, save yourselves  
This is only the beginning

Just watch your back, watch your back  
'cause our lives are on this  
But we're safe right here where we belong  
We shot ourselves here again  
Leave our bullets in the ground  
They won't disappear, disappear while we're still breathing

They will not disappear while we're breathing  
One, two, three!

Why are we making this collision between us?  
We can't help ourselves, save yourselves  
This is only the beginning  
Why are we making this collision between us?  
We can't help ourselves, save yourselves  
This is only the beginning

This time we're not dead  
It's the truth, it's the truth  
This time is not dead  
It's the truth, it's the truth  
This time we're not dead  
It's the truth, it's the truth  
This time is not dead  
It's the truth, it's the truth

Yeah!

One, two, three, four!
