

## Particle

Marmozets

Lost, lost in something so complex  
time itself stops; it's useless.  
When I'm in my own world  
Mirroring self-delusion  
Delirious poison fusion  
Take me home, take me home

The particle that trips me into your hands  
Cold but now I understand why I am

Like music to my ears  
The way that it flows oh.  
Particle, I'm here  
Please don't go.

Satisfy blink my eyes visions day by night  
They're brother, sister; dark and the light  
Holding hands petrified  
We are the catastrophic system  
We are crystal children  
Far from distance
