

Fly Away

Marques Houston

I could see it on your face girl
That you ain't happy and you know it
Know you're in your own place girl

I know because I've been watching for a while
And those other guys don't care enough about you
I said that I've been watching for a while
And I know a guy that would be much better for you

So please let me
Fly you away So please let me
Fly you away To love's space

I could see it in your eyes girl
That you need someone to love
And your man ain't got a clue
What he has in you
But I know
And I see girl
How good it can be girl
Because you see it too

I know because I've been watching for a while
And those other guys, don't care enough for about you
I said that I've been watching for a while
And I know the guy that will be much better for you

So please let me
Fly you away So please let me
Fly you away To love's space

Take good care of you
Do all the things your man won't do
And all the things you're going through
I'm a put an end to

So please let me
Fly you away So please let me
Fly you away To love's space
