

I Love Her

Marques Houston

I love her
But I love you

Don't know if I want Keyshia, Felicia or Emma
Theres something bout each one of them
All of them special
Been all around the world
Theres so many girls with different gaulities
Everyone seem to have something I want

Whooooooo
I need that one
Couple things slide out but I swear that shes the one
Think I'm sure
Tell me what this grown man should do
I gotta have her but I want you to
I'm so confused

I love her
I love you
But I love her
And her too
They all could be the one
So how can I pick one, one, one, one
When I love them all

I love her
I love you
But I love her
And her too
They all could be the one
So how can I pick one, one, one, one
When I love them all

I love her but baby I love you
Good with love, but moneys feeling nothing I can do
Give me dear
If only she could dress like you
And you could walk the way she does Oooo Oooo

Whooooooo
I need that one
Couple things slide out but I swear that shes the one
Think I'm sure
Tell me what this grown man should do
I gotta have her but I want you to
I'm so confused

I love her
I love you
But I love her
And her too
They all could be the one
So how can I pick one, one, one, one

I love her
I love you

But I love her
And her too
They all could be the one
So how can I pick one, one, one, one
When I love them all

I gotta have it, now what I'm gone do
I gotta have her but I want her too
So now I need help with my obsessions
Im working on my addictions
By stopping for all the pretty girls
In the cars I be whippin

In my position, Im balling like the Pistons
Im on fire
I stop drop and I roll and I watch em get it
They see the moon is like a vampire bit em
I scoop em, hit em, and dip em turn em into honey dippas

The money gettas is what the ladies be callin us
Acting like they ignoring us
Really they be on all of us

And all of us
We can take a flight
you, you, you and her
And We can make it right

I love her
I love you
But I love her
And her too
They all could be the one
So how can I pick one, one, one, one
When I love them all

I love her
I love you
But I love her
And her too
They all could be the one
So how can I pick one, one, one, one

I love her
I love you
But I love her
And her too
They all could be the one
So how can I pick one, one, one, one
When I love them all

I love her
I love you
But I love her
And her too
They all could be the one
So how can I pick one, one, one, one
When I love them all
