## **Brand New Lover**

## **Marshall Crenshaw**

I'm feelin' dazed and dissipated I only know one thing for sure Gotta find me a brand new lover There isn't any other cure

All my lowdown lonely feelings Have been working overtime somehow Gotta find me a brand new lover I know it better be right now Right now, right now, right now now, right now

I've got to make some changes Before the walls close in I tell you what I'm gonna do When the night comes down babe I'm lookin' for you

I need some consolation Baby come and take my hand Gotta find me a brand new lover I'm achin' more than I can stand

All my lowdown lonely feelings Have been working overtime somehow Gotta find me a brand new lover I know it better be right now Right now, right now, right now now, right now

I've got to make some changes Before the walls close in I tell you what I'm gonna do When the night comes down babe I'm lookin' for you

I'm dazed and dissipated I only know one thing for sure Gotta find me a brand new lover There isn't any other cure
