## Live It Up

## **Marshall Crenshaw**

You never want to comfort me Knowing what you really need You always say you've had enough You never want to give it up

But everybody's got to move and Everybody's got to groove Everybody needs love sure enough Everybody ought to live it up

Well, what did I do that was wrong? I just want to have some fun We've been holding back for too long And I want to live, we've gotta live it up

I've got to ease your mind I know I'll have a bit of luck To make you have a good time I've got to make you live it up
