

One Day With You

Marshall Crenshaw

For one day with you
I would break off every previous engagement
For one day with you
I would honor any strange arrangement
I'd walk on my hands through the jungle
Cross the tundra white with snow
Just tell me where you want me and there I'll go
For one day with you
I'd risk ruin, pain and degradation
For one day with you
I would gladly ruin my reputation
Just to feel your hand, resting on my knee
I'd face danger, death or injury
Oh believe me

For one day with you
There's no terrible thing I would not do
For one day with you
It's such a mystery
Though I try and try I can't uncover
Why we're meant to be
In a world where we can't have each other
I'm sitting all alone
Staring at the moon above
Thinking about the last time we made love
