

# Will We Ever

Marshall Crenshaw

There's nothin' on the radio  
Another hundred miles to go  
Through the fog, and rain, and wind  
Will we ever love again?

I'm staring straight into the night  
Feeling more wrong than right  
Same old questions in my head  
I just wanna be in my own bed

Can't wish on a star  
I can't even see the sky  
It's hard to believe that this rainy night  
Might be over by and by

Plastic key, unlock the door  
I've seen way too many more  
Like this room I'm standing in  
Will we ever love again?

I'd gladly fall under your spell  
Kiss those lips I know so well  
If I only had you near  
You can make the darkness disappear

Now the times we've shared  
Seem long ago and far away  
Right now it's you and only you  
On my mind, night and day

I wanna feel you breathe on me  
Hold you tight and then I'll be  
As close to Heaven as I've been  
Will we ever love again?

Can't wish on a star  
I can't even see the sky  
It's hard to believe that this lonely night  
Might be over by and by

I wanna feel you breathe on me  
Hold you tight and then I'll be  
As close to Heaven as I've been  
Will we ever love again?  
Will we ever love again?
