Bleeding All Over You

Martha Wainwright

There are days when the cage Doesn't seem to open very wide at all There are others that would shock The most indiscriminate lovers of all My heart was made for bleeding all over you

You've got a girlfriend and I can only Talk about her for so very long Then my mind turns into my heart And whispers into that dark cave that I've been wronged

My heart was made for bleeding all over you And I know you're married but I've got feelings too But I still love you

You moved up North and got a farm house There's cow shit in your brain and love in your heart I'm in the city and I'm trapped between Two buildings then having to start at the start

You've got a daughter, now you're a father You have your pack and they are wild

My heart was made for bleeding all over you And I know you're married but I've got feelings too And I still love you I still love you

I've got feelings too And I still love you Yes, I still love you
