## I Wanna Make An Arrest

## Martha Wainwright

I don't mind being left behind I no longer care where the sound is coming from I can't hear the tears in your eyes I am always, always in disguise

I wanna make an arrest And stop time and this test And lie down in the road And you're still at home And you're still at home

Pavement is changing under my feet I no longer walk with chin high or skip to the beat I need to lie down It's terminal, see I'm feelin' the pain I've got the disease

Oh, I wanna make an arrest And stop time and this test And lie down in the road And you're still at home And you're still at home

Take off your shoes And stay awhile I've been here waitin' to see your smile Summer's comin' and the night's are long I've been here listenin', cryin' to your song

Oh, I wanna make an arrest And stop time and this test And lie down in the road And you're still at home And you're still at home

Running against the clock Color blind all this time I went for a ride And I left your side Now I'm in the lost and found And you're not around And there's no one I can see who can help me

I wanna make an arrest And stop time and this test And lie down in the road And you're still at home

I wanna make an arrest And stop time and this test And pick up the phone And you're still at home And you're still at home...
