

Hey Girl

Martin Chodúr

Hey girl, what you're gonna do now
You say you miss my point of view
All of our little misunderstandings
Made bad impression on you

Since when did you begin to notice
Saying you're gonna be behind
And now, what you're gonna do now?
Say you're gonna bring your love around

I never even know you,
But this time, about this I am sure

I didn't even know you, sometimes I feel so bad
I'll let you go
I didn't even know you were going out of your head
All the time you stay behind
Looks a God hide an evil in your mind
What you're gonna do now?

All this time you stay behind
Hide an evil right there in your heart
All this time you stay behind
Hide an evil right there in your heart
All this time you stay behind

I didn't even know you, sometimes I feel so bad

Looks a God hide an evil in your mind
What you're gonna do now baby?
