

Shelter From The Storm

Marty Stuart

And here I am, and here I'll stay
I will be your shelter
A shelter for your heart
I will be a harbor when the world is cold and dark
I will stand beside you
Through this whole life long
To love you and to give you
Shelter from the storm

You are the love, love of my life

Til the stars in heaven
Fall down from the sky
Til the silent waters and the rivers all run dry
I will stand beside you
Through this whole life long
To love you and to be your
Shelter from the storm
