Till I Found You

Marty Stuart

When I was a young man I thought I knew everything But I didn't know nothing, till I found you I used to get around some, I thought I'd seen everything But I hadn't seen nothing, till I found you

Till I found you there was no light Nothing ever worked out right Baby it's true, till I found you

Everybody's searching, they're trying to find something But I don't need nothin', now I've found you 'Cause you're the only one love, the only one I'm sure of And all I want is your love, now that I found you

Till I found you there was no light Nothing ever worked out right Baby it's true, till I found you Baby it's true, till I found
