

## Full Circle

Massari

Seems like only yesterday that we were sleeping on the floor  
Not a penny to a name nothing to eat  
I was way too young to drive but still you handed me the keys  
Had your trust I know you never doubted me

Now I'm cursing the days that came were taring us apart  
Trying to look in the mirror wanna know it right from the start  
And I was mistakin I've been takin' this shit it so far  
It feels like the screen just been taken over my memories

When you think you got it all  
(got it all got it all)  
When no one take it till its gone  
(don't no one take it till its gone) [X2]

Be careful what you doing cause she is coming back to you  
(its coming back you feel it coming back) [X2]

Everybody heard that you messin with karma ha  
No one to blame around  
Whisper all the drama I guess she came around  
So you better say a prayer when you lay it down  
Once ironic back this game you can't play around  
I am in the doc rippin deeper than the shark eaten  
You break my heart I fucking stab you with the sharp peices  
Now its storm crying storm  
Bitch we move deepin Ha!  
We starved while we watched you all eating  
Thats your heart beaten  
Stay in piece  
Just hold tight can't breath  
I see the man bleed over them greez  
You know they got to try to kill what they can't be  
Me mothaufucka flow with a little match  
Feels like I was in my grave I ain't hopin at ya ha  
Fuck it though I ain't looking back  
Cause I'm former of this back?!?!?

When you think you got it all  
(got it all got it all)  
When no one take it till its gone  
(don't no one take it till its gone) [X2]

Be careful what you doing cause she is coming back to you  
(shes coming back you feel it coming back) [X2]

We was young and in the streets they'll be talking about our flow  
While we had is something they had never seen  
We was walking talking bout swag to the [?] about them dreams  
Dreaming all about the things we wanna be

Now I'm cursing the days that came were taring us apart  
Trying to look in the mirror wanna know it right from the start  
And I was mistakin I've been takin' this shit it so far  
It feels like the screen just been taken over my memories

When you think you got it all

(got it all got it all)  
When no one take it till its gone  
(don't no one take it till its gone) [X2]
