

Under The Radar

Massari

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar

I'm just trying to get mine
Living my life
Stained from the grind
Been hustlin so long my life
But still they try to bring me down, ohhhhh

But they don't really know that
I've been watching them close like a satellite
But they don't really know that
I'll be standing in the crowd in my camoflauge

So I lay low, lay low
They never see me coming under the radar

So I lay low, lay low
They never see me coming under the radar

So I lay low, lay low
They never see me coming under the radar

So I lay low, lay low
They never see me coming under the radar

I can see it in their eyes
Envy on their eyes, still I'm not suprised
You know I'm strong enough to take them hard times
I ain't about about to give it up, ohhhhh
But they don't really know that
I've been watching them pulse with my third eye
But they don't really know that
You can never change the blueprint of my life

So I lay low, lay low
They never see me coming under the radar

So I lay low, lay low
They never see me coming under the radar

So I lay low, lay low
They never see me coming under the radar

So I lay low, lay low
They never see me coming under the radar (radar, radar, radar)

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
So I lay low, lay low

They never see me coming under the radar
