

## Children of the night

Masterboy

Chorus:

Feel like children of the night  
let's walk into the light  
like children of the night

Repeat chorus

a child is born to the night  
will it live to see the light

ghetto life means

tears and pain

many people cry in vain

this generation

over the nation

we're gonna take control

like revolution's

education is the key

leave your hands off ecstasy

respect for life and liberty

we're gonna take control

like revolution's
