Oh no, I realize it again, I can it, changes in that
And in the oceans, and in the oceans fade away, they fade away
I don't know what I feel, I see got dissappear
That the something that moves my body right
And I know what I like, at the time is alright
Just change the feelings of my life
You don't know what you feel, do you have dissappear
That the something that moves your body right
And you know what you like, so the time is alright
To change the feelings of your life

Feel my life, come and stare, feel my life all the way Feel my life, go tonight, feel my life, it's alright Feel my life, come and stare, feel my life all the way Feel my life, go tonight, feel my life, it's alright

So I forget about everything and now my soul comes back again And there is motion, there is motion, night and day, night and day

Feel my life, come and stare, feel my life all the way Feel my life, go tonight, feel my life, it's alright Feel my life, come and stare, feel my life all the way

I don't know what I feel, I see got dissappear
That the something that moves my body right
And I know what I like, at the time is alright
Just change the feelings of my life
You don't know what you feel, do you have dissappear
That the something that moves your body right
And you know what you like, so the time is alright
To change the feelings of your life

Feel my life, come and stare, feel my life all the way
Feel my life, go tonight, feel my life, it's alright
Feel my life, come and stare, feel my life all the way
Feel my life, go tonight, feel my life, it's alright
Feel my life, come and stare, feel my life all the way...
