

# Kind Hearted Light

## Masterplan

We held up the metal torch  
And they tried to take the flame  
We've been running against the wall  
But we always overcame  
No sense no reason  
We are the ones you love to hate  
Feed the desire  
Fighting for our dreams  
Just look behind you  
The visions once believed  
Let's burn the bridges down  
And cast dispersion to the wind  
Who can we trust again  
We must look to find another way to  
That kind hearted light  
Beyond the dark  
But clouds still hide the seven seas  
As the story unfolds  
No regret  
Unlock the key  
To unite eternally  
Look for an exit  
In a dead end street of lies  
Judgement day comes to all  
Can you afford the price  
Turn your blackened faith  
And drain the venom from your mind  
Who can we trust again  
We must look to find another way to  
That kind hearted light  
Beyond the dark  
But clouds still hide the seven seas  
As the story unfolds  
No regret  
Unlock the key  
To unite eternally  
For eternity  
Who can we trust again  
We must look to find another way to  
That kind hearted  
That kind hearted light  
Beyond the dark  
But clouds still hide the seven seas  
As the story unfolds  
No regret  
Unlock the key  
To unite eternally  
Kind hearted light  
Beyond the dark  
But clouds still hide the seven seas  
As the story unfolds  
No regret  
Unlock the key  
To unite eternally
