Mastodon

Silent all your life  
Running without vision  
Hollowed out inside  
Wronging all that's right

There's no cost to be alive  
And no reason to escape from us  
There's no illness and no pain  
Haven't found any suffering

The road is dark and bare  
No clarity, no light  
The moment came and swallowed us  
Blinding all our sight

We will keep you free from dark  
All you have to do is stand with us  
I will mend your broken heart  
And retort the trials that you have lost

Give your life  
So I can breathe  
Save your life  
It's all we need

We can be above the ground  
And devour your humanity  
Follow me and follow sound  
To the end of your eternity

Give your life  
So I can breathe  
Save your life  
It's all we need
